Introduction

Each year since 1993 the Kansas Hospital Association (KHA) has provided hospital discharge data to the Health Care Data Governing Board for dissemination to policy makers, program managers and the public; data is now available through 1998. The data provided to Kansas Department of Health and Environment (KDHE) by KHA summarize information pertaining to the number of hospitalizations by Diagnostic Related Group (DRG) by county of residence over a period of five years. The data are divided into four individual files: length of stay and gender, disposition, age group, and payment method. The present summary is restricted to the first of these files, but future publications will summarize findings from analysis of the remaining files.

One of the uses for this data is identifying predominant reasons Kansans are hospitalized by county and statewide. With this information, health analysts and policy makers can understand more about the diversity in the health of Kansans in different areas of the state.

In the following pages we present a summary of hospital discharge data for the years 1994 - 1998. In Section I data is aggregated by DRG and presented on a statewide basis. In Section II DRG data is presented for each county; and in Section III data is aggregated by county and presented for each DRG category; no data is displayed for a single year. Data for all DRGs that pertain to maternity (mothers and neonates) were excluded from detailed analysis due to their frequent occurrence in all counties.

The main tables in Section II (pages 8 - 113) display the twenty most frequent DRGs in each county averaged over the years 1994 - 1998, along with the corresponding values for mean age and length of stay (LOS). Each table also contains ratios of the number of cases per 100,000 population for each Kansas county and the state, and a chart displaying Payment Source information. A separate table (Section I, p. 2) presents five-year summary rates per 100,000 population for Major Diagnostic Categories (MDCs).

Due to the sparse populations of some Kansas counties and in the interest of preserving patient confidentiality, the list of DRGs is incomplete for some counties. Exclusions include the following:

- ▶ Any DRG with fewer than six cases in any single county;
- ▶ Rates are not displayed when frequencies were fewer than twenty due to the unreliability of rates for small populations. We hope these exclusions will not unduly reduce the usefulness of the report's information for those conducting community health assessments.
- ▶ As source data is summarized by DRG, further detail relating to diagnosis is unavailable.

For further information about this report and other data resources, contact:

The Office of Health Care Information at (785)296-8627;

Abbreviations used in DRG descriptive names:

Alc	Alcoholic
AMA	Against Medical Advice
AMI	Acute Myocardial Infarction
CDE	Common Duct Exploration
Card	Cardiac
Cirr	Cirrhosis
D&C	Dilation & Curettage
Debrid	Debridement
DO	Disorders
Diag	Diagnosis
ESW	Extracorporeal Shock Wave
Exc	Except
GI	Gastrointestinal
Hepa	Hepatitis
Impl	Implant
Int Fix	Internal Fixation
Myeloprolif	Myeloproliferative
OR	Operating Room
Pdx	Principal Diagnosis
Proc(s)	Procedure(s)
Sys	System
T&A	Tonsillectomy and Adenoideectomy
TIA	Transient Ischemic Attack
URI	Upper Respiratory Infection
W CC	With Comorbidities or Complications
W/O CC	Without Comorbidities or Complications
Wnd	Wound

Published by: Health Care Data Governing Board

Data by county of residence of patient.

Most Frequent Conditions Treated in Community Hospitals Excluding Maternity (DRGs 370 - 391)

Mean Frequencies and Rates, 1994 - 1998

Notes:

For column headed "Mean No. of Cases," missing values marked by # are less than 6 and are not shown for reasons of confidentiality.

For the column of Mean Rates by County, missing values marked by ** denote rates where frequencies are less than 20 and are therefore unreliable.

"Mean No. of Cases" = Total Cases 1994-1998 per County per DRG / 5

"Mean Age" = Total Age of All Patients 1994-1998 per County per DRG / Total Cases 1994-1998 per County per DRG.

"Mean LOS" = Total LOS for All Patients 1994-1998 per County per DRG / Total Cases 1994-1998 per County per DRG

"Mean Rate" (County) = Mean No. of Cases / Average County Population 1994-1998

"Mean Rate" (State) = Mean No. of Cases / Average State Population 1994-1998
